## About this report

This report is a summary of the activities of the Central Health and Disability Ethics Committees (HDEC) for the period of 01 July 2021 – 30 June 2022. It includes a summary of the applications reviewed during the year, details of any complaints received (and how they were resolved), and a list of new applications submitted. Previous HDEC annual reports included information on committee membership and attendance. These details are no longer included in the report.

## About the committee

The Central Health and Disability Ethics Committees (HDEC) is a Ministerial committee established under section 87 of the [Pae Ora \(Healthy Futures\) Act 2022](#). Its members are appointed by the Minister of Health through the public appointments process.

The primary function of the Committee is to provide independent ethical review of health research and innovative practice in order to safeguard the rights, health and wellbeing of consumers and research participants and, in particular, those persons with diminished autonomy by checking that it meets or exceeds established [ethical standards](#).

### Approvals and registrations

The Central HDEC is approved by the Health Research Council Ethics Committee for the purposes of section 25(1)(c) of the [Health Research Council Act 1990](#).

The Central HDEC is registered (number IRB00008712) with the United States' [Office for Human Research Protections](#). This registration enables the committee to review research conducted or supported by the US Department of Health and Human Services.

## Chairperson's report

Another year has flown by for Central Ethics, as a consequence of the large number of research proposals we have assessed. Full applications, expedited, amendments, progress reports, protocol deviations all make for a busy time. Busy not only for us, our administration team needs a huge vote of thanks for coordinating all this for us.

I would also like to extend our thanks to our Researchers. The quality of application has improved immensely, following templates which mean they comply with the ethical guidelines required by New Zealand and making the approval process faster. It is always harder when they are working with an overseas company, but we are all making progress.

In the year ending June 2022, the committee reviewed a total of 198 applications. 102 applications were reviewed at full committee meetings, while 96 were reviewed through the expedited (low risk) pathway.

I would like to thank the Central Committee for their time, dedication and good humour during the past year and it has been a privilege to work with them. Welcome to our new members it is always better with a full committee and you are proving this.

Helen Walker QSM

Chair – Central HDEC

# Applications reviewed

## Summary of applications received by full EC

The Secretariat notes that HDEC cannot defer, however they can provisionally approve. We have answered as if defer is a provisional approval.

No. of applications approved	3
No. of applications approved subject to conditions (minor, non-standard conditions)	35
No. of applications deferred and subsequently approved (provisionally approved before approval)	40
No. of applications deferred as at time of report (provisionally approved)	4
No. of applications that were declined in part because of no/insufficient consultation with appropriate Māori/whanau/iwi/hapu	4
No. of applications that were declined in part because of no/insufficient consultation with appropriate cultural group	1
No. of applications declined (this <u>excludes</u> those with no/insufficient consultation with appropriate Māori/whanau/iwi/hapu/cultural group)	7
No. of applications which were invalidated for incompleteness	5
<i>No. of applications which do not require ethics committee approval (applications submitted to all Committees that were out of scope (total across Committees)) Note: this number is greatly increased from prior reports due to the new Ethics Review Manager automatic scope check process</i>	382
No. of studies withdrawn by researcher (none made to meetings or reviewed)	3
No. of studies terminated by sponsor	0
No. of studies transferred to another EC	0
<b>Total number of applications received by full EC</b>	<b>102</b>

## Summary of applications received under expedited / low risk review

No. of applications approved	17
No. of applications approved subject to conditions	16
No. of applications deferred and subsequently approved	48
No. of applications deferred as at time of report	1
No. of applications which do not require ethics committee approval (applications submitted to Committee that were incomplete or out of scope)	4
<i>No. of applications referred for full committee review</i>	2
No. of applications declined	10
No. of studies withdrawn by researcher	0
<b>Total number of applications received under expedited / low risk review</b>	<b>96</b>

**Total number of applications received**

**198**

# Complaints and overdue application summary

This section outlines complaints about decisions made by the Committee during 2022.

## Complaints received

No complaints were received during the reporting period regarding any Central HDEC matters.

## Overdue review

Average review times consider the time taken for the Secretariat to process applications and the time taken for the Committee to review applications. The clock is stopped when a decision letter is emailed to applicants. Average review times exclude time taken for researchers to respond to requests for further information. Researchers have up to 90 days to respond.

Average review time was 26 days for expedited applications. Target timeframe for expedited applications is 15 calendar days. ([Standard Operating Procedures for Health and Disability Ethics Committees](#), para 9-102).

Average review time was 42 days for full applications. Target timeframe for full applications is 35 days. ([Standard Operating Procedures for Health and Disability Ethics Committees](#), para 54-59).

In both review pathways, the clock days went over. This appears to be primarily due to the changeover of review system the HDECs were using partway through the reporting period, causing delays as a result of committee members, secretariat and researchers becoming more familiar with the system and able to respond in a timely manner.

# Appendix 1: Details of applications reviewed<sup>1</sup>

## Applications reviewed by the committee

Review reference	Project title	Coordinating investigator	Review date received	Date of first review	Outcome of first review	Review status	Date of final outcome	Coordinating investigator organisation	Sponsor organisation
